PROFESSIONAL SUMMARY

Fourth-year BS Information Technology student and five-time Dean's Lister at the University of Cebu - Banilad who builds full-stack web applications with React, Node.js, and MySQL. Built and deployed MotoTrack, an inventory, sales, and forecasting system used by a real motor parts business in Cebu. Seeking an internship or entry-level software developer role.

PROJECTS

MotoTrack - Inventory, Sales, and Forecasting System
React, Node.js, MySQL, Tailwind CSS | *moto-track-inky.vercel.app* | *github.com/Prinss-git/MotoTrack*

- Built for a real single-store motor parts business; in production, managing 2,000+ SKUs across 158 categories.
- Developed point of sale, stock transactions, and monthly sales reports with daily breakdowns.
- Implemented demand forecasting with stockout prediction to flag items before they run out.
- Added role-based access for Admin and Staff, Excel bulk import, and CSV export.

Gastador - AI-Powered Expense Tracker (PWA)
React, TypeScript, Firebase, Groq API, Tailwind CSS | *gastador.vercel.app*

- Integrated AI categorization as users type and monthly money-saving insights powered by Groq (Llama 3.3).
- Made the app offline-capable with Firebase persistent cache and installable on any device.

GlobeScope - Country Information Explorer
React, Node.js, Express, Axios | *country-info-beta-beryl.vercel.app*

- Built a searchable explorer for 250 countries with an interactive SVG world map, 3D globe, and side-by-side comparison.
- Added authenticated favorites with personal notes using data from the REST Countries API v3.1.

GitHub Profile Analyzer
React, Node.js, Express, Chart.js | *github-profile-analzyer.vercel.app*

- Visualizes any user's top languages, 12-month commit activity, and most-starred repositories.
- Built a backend proxy that keeps the GitHub API token server-side.
