PROFESSIONAL SUMMARY

Fourth-year BS Information Technology student and five-time Dean's Lister at the University of Cebu - Banilad who builds full-stack and AI-powered applications. Leading RescueEye, an AI drone-based disaster response capstone, and built MotoTrack, an inventory and sales system used by a real motor parts business in Cebu. Seeking an internship or entry-level software developer role.

PROJECTS

RescueEye - AI Drone-Based Disaster Response System (Capstone) 2026 - Present
Team Leader, Full-Stack and AI Developer | Python, FastAPI, YOLOv11, ONNX Runtime, React, TypeScript, Supabase, Capacitor | github.com/SamoneSamwhere/RescueEye

- Lead a 4-person capstone team building a drone-based disaster response system for LGU disaster offices and rescue units; coordinate tasks and weekly progress reports ahead of the November 2026 defense.
- Built the AI detection pipeline: trained YOLOv11 fire/smoke and damage classification models on VisDrone, AIDER, D-Fire, and HERIDAL; added posture- and stillness-based casualty detection; optimized GPU inference with ONNX Runtime across multiple live drone feeds.
- Developed the dispatch system that alerts the nearest available responders by SMS and in-app notification once Command Staff verify an AI detection.
- Built the Field Responder Android app (Capacitor) for accepting missions, navigation, and status updates, and integrated the Supabase (PostgreSQL) database.

MotoTrack - Inventory, Sales, and Forecasting System
React, Node.js, MySQL, Tailwind CSS | moto-track-inky.vercel.app | github.com/Prinss-git/MotoTrack

- Built for a real single-store motor parts business; in production, managing 2,000+ SKUs across 158 categories.
- Developed point of sale, stock transactions, and monthly sales reports with daily breakdowns.
- Implemented demand forecasting with stockout prediction to flag items before they run out.
- Added role-based access for Admin and Staff, Excel bulk import, and CSV export.

EDUCATION

Bachelor of Science in Information Technology 2023 - Present
University of Cebu - Banilad, Cebu, Philippines

- Currently in 4th year; Dean's Lister for five semesters
- Relevant coursework: Data Structures, Algorithms, Database Management, Software Engineering

Senior High School, TVL - Computer and Communication Services 2021 - 2023
Benedicto College, Cebu, Philippines

AWARDS AND HONORS

Dean's Lister, University of Cebu - Banilad 2023 - 2026

- 1st Year: 1st Semester and 2nd Semester (A.Y. 2023-2024)
- 2nd Year: 2nd Semester (A.Y. 2024-2025)
- 3rd Year: 1st Semester and 2nd Semester (A.Y. 2025-2026)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, HTML, CSS, Java, C++, Kotlin

Frontend and Mobile: React, Vite, Tailwind CSS, TanStack Query, Leaflet, Capacitor (Android), Bootstrap

Backend and Databases: Node.js, Express, FastAPI, WebSockets, REST APIs, MySQL, Supabase (PostgreSQL), Firebase

AI and Computer Vision: YOLOv11, ONNX Runtime, object detection, pose estimation, image classification

Tools: Git, GitHub, Vercel, Docker, FFmpeg, Cloudflare Tunnel
